SHAWAF KHAN A

Tamil Nadu, India shawafkhan007@gmail.com 7200399628 in/shawaf-khan007

PROFILE

- A dedicated and fast learner with a strong interest in technology, innovation, and problem-solving.
- Adapts quickly to new tools, frameworks, and environments while maintaining focus on quality and collaboration.
- Possesses excellent communication skills and the ability to express ideas clearly and effectively within a team.
- Highly motivated to learn, grow, and take ownership of responsibilities with a focus on delivering reliable results.
- Demonstrates a good understanding of **web technologies**, **machine learning fundamentals**, and **API integration**.
- Focused on building **visually appealing and user-friendly interfaces** that enhance overall experience.
- Thrives in dynamic, fast-paced environments and enjoys solving complex technical challenges through innovation and teamwork.

EDUCATION

BE computer science
KCG College of Technology • Chennai, India • 2025 • 80.3

Higher Secondary Certificate (HSC)
Montfort Academy mrt. Hr. Sec school • Chennai, India • 2022 • 85%

Secondary School Leaving Certificate (SSLC)
Montfort Academy mrt. Hr. Sec school • Chennai, India • 2020 • 65%

EXPERIENCE

Machine learning
VCodezs **July 2025 - October 2025, sholinganallur, OMR, Chennai**

- Developed and deployed machine learning models that elevated predictive accuracy for key business applications, collaborating with cross-functional teams to ensure seamless integration into existing workflows.
- Applied **supervised and unsupervised learning algorithms** (e.g., Linear Regression, SVM, Random Forest, K-Means) to solve business problems.
- Conducted **feature engineering and hyperparameter tuning** to optimize model performance.
- Designed **data visualization dashboards** with **Matplotlib and Seaborn** to communicate model outputs clearly.

Intern - Data Analytics, Machine Learning, Artificial
Novitech **05/2024 - 08/2024, Chennai, India**

- Engaged in projects related to data analytics
- Developed understanding of artificial intelligence concepts
- Collaborated in teams to implement machine learning solutions.

PROJECT

SignLang – Smart Sign Language Communication Platform
VCodezs • tinyurl.com/wk6dk3y4 • September 2025 - Present

- Developed a **real-time sign recognition system** using **Computer Vision** and **Machine Learning (CNN, Mediapipe, TensorFlow)** to detect and translate gestures.
- Implemented **bidirectional communication**, converting **signs to text/speech** and **text/speech to animated sign avatars** for seamless two-way interaction.
- Integrated **camera-based gesture tracking** for accurate recognition with minimal latency.
- Designed an **intuitive and accessible UI** for both deaf/mute and non-signing users.
- Enhanced inclusivity using **Natural Language Processing (NLP)** for text and speech understanding.

Vegil-AI Proactive Urban Safety Through AI-Enhanced CCTV Monitoring
VCodezs • June 2025 - August 2025

- Developed an **AI-powered surveillance system** for real-time detection of violent and suspicious human activities (e.g., fighting, assault, or falling) using **YOLOv8** and **Ultralytics**.
- Integrated **TensorFlow** for deep learning–based image and video classification to enhance object recognition accuracy.
- Designed and deployed a **Flask-based backend server** to handle live CCTV stream processing and trigger automated alerts.
- Implemented **real-time emergency response automation**, sending alerts with **visual proof** to nearby authorities via API calls.
- Optimized **object tracking** and motion analysis using **OpenCV** and **DeepSort**, achieving high detection precision in dynamic environments.

Waste Auction — Smart Waste Management & Recycling Platform

KCG College Of Technology • tinyurl.com/3m9mkxhm • December 2024 - February 2025

- Designed and developed a **web-based Waste Auction platform** enabling users to sell or auction recyclable waste materials to authorized buyers.
- Implemented **real-time bidding functionality** using **Socket.io** for dynamic and interactive auctions.
- Integrated **AI-based waste classification system** using **TensorFlow / OpenCV** to identify types of waste (plastic, metal, glass, organic, etc.) from uploaded images.
- Created an **eco-friendly auction interface** where users can list waste categories, base prices, and quantities.

Vehicare - Smart Vehicle Safety & Maintenance System

KCG College Of Technology • tinyurl.com/3ukhezsj • May 2024 - August 2024

- Designed and implemented an **AI-based vehicle health monitoring system** capable of predicting potential mechanical failures using sensor data and ML algorithms.
- Utilized **Python, Scikit-learn, and TensorFlow** to build predictive maintenance models for early fault detection.
- Developed a **Flask-based backend** and integrated it with a **React.js frontend** for real-time analytics visualization.
- Created a **user dashboard** displaying vehicle performance metrics, fuel efficiency, and service history.
- Integrated **Firebase / MongoDB** for secure storage of diagnostic and user data.

Med Al App - Al-Driven Healthcare Platform

KCG College Of Technology • tinyurl.com/anu4pa5b • June 2023 - September 2023

- Developed a comprehensive **AI-driven healthcare application** enabling users to access medical services, analyze reports, and connect with doctors in real time.
- Implemented **AI-based medical report scanning** using **OpenCV** and **TensorFlow** to detect abnormalities such as tumors and skin diseases.
- Built a **prescription management system** with OCR (Optical Character Recognition) for automated extraction of medicines and dosage reminders.
- Integrated an **AI chatbot (Medibot)** for patient interaction, appointment booking, and health guidance using **NLP** models.
- Designed a **consultation system** with dynamic doctor listings, specialization filters, and real-time appointment booking.
- Added an **SOS emergency module** that detects user location via **Google Maps API**, displays nearby hospitals, and triggers emergency calls using **Twilio API**.

CERTIFICATIONS

Anaconda Python for Data Science

Linkedin • 2023

- Professional Certificate.

Career Essential in Software Development

Microsoft and LinkedIn • 2023

- Course on managing and analyzing data in Excel.

Full-Stack Web Developer Certification

Linkedin • 2023

- Certification in Full-Stack Web Development.

DevOps Professional Certificate

Linkedin • 2023

- Certification in DevOps practices.

COURSEWORK

Artificial Intelligence

Novitech • 2024

Machine Learning

Novitech • 2024

Data Analytics

Novitech • 2024

JAVA programming language

Cyber Soft Solution Center • 2022

Python Programming Language

Cyber Soft Solution Center • 2022

C/C++ Programming Language
Cyber Soft Solution Center • 2022

INVOLVEMENT

- Leading hackathon teams to develop innovative solutions.
- Contributing to open-source projects and collaborating globally.
- Organizing and managing coding workshops or tech meetups.

AWARDS & HONORS

INNOTHON JURY AWARD
KCG College Of Technology • 2025

INNOCOM JURIE AWARD
KCG College Of Technology • 2025

MATHZONE 3RD PRIZE
Stella Maris College • 2023

SKILLS

C/C++

CSS

HTML,

Java

JavaScript

Python
